**Financing Nonprofit Organizations**

Imigo Garcia-Rodriguez 2020-01-23 The financial issues of nonprofit organizations (NPOs) have increased their importance in recent years, especially after the last global economic downturn. In this way, NPOs have been threatened by a reduction in income, while their work and expenses have not decreased. In this book, the editors bring together several topics that the academic literature has previously addressed, connecting them to each other and evaluating how all these issues are interrelated. Financing Nonprofit Organizations analyses the state of art of these financial topics and the consequences of the last economic crisis. It dives into the interrelations of these concepts to suggest lines of future research and to reflect on the future of the different sources of funding of the NPOs. It will be of interest to students, practitioners, and researchers interested in initiating and updating their knowledge in the growing field of the financial aspects of the NPOs.

Philanthropy and the Nonprofit Sector in a Changing America-Charles T. Clift, Charles T. Clift 2001 This collection brings together the views of a stellar assemblage of scholars, practitioners... and a host of other talented and distinguished citizens of the independent sector. .. A must read... --Philanthropy Monthly In an attempt to analyze future directions of the increasingly influential nonprofit sector, the American Assembly and the Indiana Center on Philanthropy sponsored a conference that brought in leading scholars and practitioners. Participants were asked to consider what forces will determine the shape and activities of philanthropy and the nonprofit sector in the next decade. This volume is a product of this inquiry. Contributors focused on a variety of pressures, including the evolution of federal programs, the blurring of lines between non-profit and for-profit organizations; the changing distributions of income; a revived interest in community and civil society; the evolution of religion and other regulatory reform; and a retreat of government from various policy areas.

Private Action and the Public Good-Walter W. Powell 1998-03-30 Governments around the world are turning over more of their services to private or charitable organizations, as politicians and pundits celebrate participatory activity in civic culture. But can nonprofits provide more and higher-quality services than governments or for-profit businesses? Will nonprofits really increase social connectedness and civic engagement? This book, a sequel to Walter W. Powell’s widely acclaimed The Nonprofit Sector: A Research Handbook, brings together an original collection of writings that explore the nature of the “public good” and how private nonprofit organizations relate to it. The contributors to this book—eminent sociologists, political scientists, management scholars, historians, and economists—examine the nonprofit sector through a variety of theoretical and methodological lenses. They consider the tensions between the provision of public goods and the interests of members and donors in nonprofit organizations. They contrast religious and secular nonprofits, as well as private and nonprofit provision of child care, mental health services, and health care. And they explore the growing role of nonprofits in the United States, France, Germany, and Eastern Europe, the contribution of nonprofits to economic development, and the forms and strategies of private action.

Human Services as Complex Organizations—Veskelel Hasenfeld 2010 Since the first edition was published in 1992, there has been a tremendous amount of change in the arena of human services organizations. This book in many ways laid a critical foundation for viewing human services organizations as a separate entity than mainstream organizations and management. It sets the foundation to view human services differently because human services organizations work on people and therefore have a different set of principles to take into consideration. It presented the idea of viewing human services organizations as organizations that process people as material (people processing or people changing). The new edition will pay particular attention to the cultural perspective and social justice as well as the feminist approach and the view that human services organizations are gendered (i.e., that mostly women work in human services except for men in management). It will also address the issue of advocacy and agents of social change.

Nonprofit Nation—Michael O’Neill 2002-11-29 In Nonprofit Nation, the new edition of his classic work, O’Neill takes a fresh look at the nonprofit sector and the power it has in shaping its growing visibility and strength. Like the first-edition, this new book is an up-to-date, comprehensive guide understanding the nonprofit sector. Identifying and examining the major nonprofit subsectors-health care, arts, social service, and religious organizations, for example-and detailing their particular concerns and impact enable O’Neill to explore their influence on business, government and society. The new edition offers: Expanded sections on scope and impact Updated and enlarged statistical information New insights on the development of the nonprofit sector A new section on theories of the nonprofit sector

The Study of Nonprofit Enterprise—Helmut K. Anheier 2003-07-31 This volume addresses the need to revisit the very economic principles that in the past two decades have contributed so much to the development of a concentrated research area on nonprofit organizations. Long neglected as a topic of theorizing and empirical investigation by mainstream economics in particular, these initial theories of nonprofit organizations, introduced by Burton Weisbrod (see Chapter 3 by Kinnig and Chapter 4 by Silversky) and Henry Hansmann (see Chapter 5 by Ottmann and Schlesinger and Chapter 6 by Hansmann) and others in the late 1970s and early 1980s, continue to shape theoretical and conceptual efforts. Importantly, their influence extends beyond economics and informs sociology, political science, and public management. The chapters in this volume will inform the market firm and the state agency as well (see Chapter 10 by Volpert, Chapter 11 by Salamon, and Chapter 12 by Welch; also Anheier & Benner, 1997; DeMaggio & Anheier, 1990). While the theoretical map of nonprofit research has expanded beyond these early attempts and now includes several other major theories such as stakeholder approaches (Chapter 1 by Ben-Ner and Gue, and Chapter 7 by Khashin), supply-side or entrepreneurial theories (Chapter 8 by Badet and Chapter 9 by Young), institutional theories (Chapter 17 by Demaggio), and comparative approaches (Chapter 15 by Anheier; see also Salamon & Anheier, 1998), we nonetheless suggest that it is time to take stock and reassess some of the very basics from which these economic theories operate. This is the main purpose of the book.

Financing American Religion—Sharon L. Miller 1999 Brings together short essays that emerged from an evaluation of the Lilly Endowment Inc.’s Financing American Religion initiative. Nineteen chapters (some previously published in well known works and others only in difficult-to-find pamphlets) explore who gives, how much, and why. They investigate how money moves and how it affects religious organizational behavior as well as how attitudes toward money have altered over time. Topics include individual giving as well as congregations and religious organizations and their resources. Annotation copyright by Book News, Inc., Portland, OR

The State of Nonprofit America—Lester M. Salamon 2004-15-33 The thousands of organizations that comprise America's private nonprofit sector represent a national treasury. Yet serious pressures are altering the playing field on which nonprofits operate, and many are responding in ways that may undermine their popular support. Despite the significance of these developments, little has been done to analyze and interpret them in a clear and understandable way. Lester M. Salamon, a leading authority on the nonprofit sector, has joined forces with more than a dozen other experts and the Aspen Institute to produce this volume, an integrated, authoritative assessment of the state of the nonprofit sector in America and the key trends affecting its evolution. The book is organized into three sections. The first examines theories that frame the development of the nonprofit sector and thus make the second examination of the sector’s major subsectors (e.g., health, social services, arts, culture, interfaith, civil rights, service, advocacy, strategy) the third focuses on major cross-cutting trends and issues (commercialization, changing government policy, accountability, and demographic and technological imperatives). The Resiliant Sector will be updated every two years. It provides a basic sourcebook for sector leaders, the press, public officials, and citizens concerned about the future of America's nonprofit sector and eager to understand the forces affecting it.

Remaking Urban Citizenship—Michael Peter Smith 2011-12-31 Due to heightened global migration and transnational mobility, many residents of the world’s cities lack national citizenship in the places to which they have moved for work, refuge, or retirement. The disjuncture between citizenship and daily life has led to devolution of claims from national to urban space. Within nation-states characterized by structured inequalities, citizenship becomes a less crucial and valuable asset. It leads increasingly to calls for greater direct involvement of marginalized classes in reshaping the institutions and spaces directly affecting their lives. These concerns—cities without citizenship and people without political power—inform the agendas of organizations that seek to restructure urban citizenship in more democratic directions. Remaking Urban Citizenship focuses on the uses and limits of such political organizations and coalitions, shows the various ways they pursue expanded rights within the city, and describes the institutional changes necessary to empower global migrants and popular classes as urban citizens. Offering individual or comparative case studies of cities in the United States, Europe, and China, contributions to this volume describe the development of actual practices of organizations working to reinvigorate citizenship at the urban scale. Collectively, they locate institutional forms that help migrants lay claim to their cities, show how migrants can become politically empowered, and identify how they can expand their rights or find other ways to belong.

The Third Sector in Europe—Adalbert Evers 2004-01-01 The contributors examine the voluntary & non-profit sectors in Europe. They discuss a number of issues regarding this ‘third’ sector.

The Changing Dynamic of Government-Nonprofit-Relationships Kirsten A. Gromberg 2021-01-31 We advance nonprofit scholarship by using the conceptual framework of policy fields to examine differences across nonprofit fields of activity. We focus on the structure of relationships among four sectors (government, nonprofit, market, informal) and how relationships differ across policy fields (there health, human services, education, arts, and culture, and religion). The fields differ notably in the economic share that each sector holds and the functional division of labor among the sectors. Similar directions of change affect how the nonprofit sector interacts with the government, market, and informal sectors. The policy fields themselves operate within national contexts of distinctive economic and political configurations. The framewokr expresses how government-nonprofit relationships differ across policy fields, the factors responsible for this variation, and offers predictive capacity to generate hypotheses and research designs for additional research. We provide insights on how nonprofit organizations differ in key sub-fields with direct relevance for policy and practice.

Measuring the Impact of the Nonprofit Sector—Patrice Flynn 2013-11-11 One of the major tasks facing researchers, practitioners, and funders is the development of empirical tools to measure the inherent worth of nonprofit organizations as well as the sector as a whole. Renowned scholars present chapters on the state of the art of performance measurement in the nonprofit sector and seek to establish a framework for a long-term research agenda to identify, quantify, and self-assess those qualities that make the nonprofit sector unique.

Identifying Talent, Institutionalizing Diversity—Jiahnbin Lee Shiao 2004-11-16 “Diversity” has become a mantra in corporate boardrooms, higher education, and government hiring and contracting. In Identifying Talent, Institutionalizing Diversity, Jiahnbin Lee Shiao explains the leading role that large philanthropies have played in establishing diversity as a goal throughout American society in the post-civil rights era. By creating and institutionalizing diversity policies, these private organizations have quietly transformed the practice of affirmative action. Shiao describes how, from the 1960s through the 1990s, philanthropies responded to recruitment, the recognition of nonblack minority groups, and the conservative backlash against affirmative action. He shows that these pressures—only shifted discourse and practice, and philanthropy beyond a binary black-white conception of race practice but also devolved with a change in its mission in supporting “good causes” to “identifying talent.” Based on three years of research on the racial and ethnic priorities of the San Francisco Foundation and the Cleveland Foundation, Shiao demonstrates the geographically uneven impact of the national transition to diversification. The demographics of the regions served by the foundations in San Francisco and Cleveland are quite different, and paradoxically, the foundation in Cleveland—which serves an area with substantially fewer immigrants—has had greater institutional opportunities for implementing diversity policies. Shiao connects these regional histories with the national philanthropic field by underscoring the prominent role of the Ford Foundation, the third largest private foundation in the country, in shaping diversity policies. Identifying Talent, Institutionalizing Diversity reveals philanthropic diversity policy as a lens through which to focus on U.S. race relations and the role of the private sector in racial politics.

Becoming a Citizen  Irene Bloemraad 2006 "Becoming a Citizen is a terrific book. Important, innovative, well argued, theoretically significant, and empirically grounded. It will be the definitive work in the field for years to come."-- Frank D. Bean, Co-Director, Center for Research on Immigration, Population and Public Policy "This book is in three ways innovative. First, it avoids the domestic navel-gazing of U.S. immigration studies, through an obvious yet ingenious comparison with Canada. Second, it shows that official multiculturalism and common citizenship may very well go together, revealing Canada, and not the United States, as leader in successful immigrant integration. Thirdly, the book provides a compelling picture of how the state matters in making immigrants citizens. An outstanding contribution to the migration and citizenship literature!"-- Christian Joppke, American University of Paris
