The Beatles and McLuhan- Thomas MacFarlane 2013 The Beatles and McLuhan: Understanding the Electric Age examines how the incorporation of electric technology in The Beatles’ art would enhance their musical impact. MacFarlane surveys the relationship between McLuhan’s ideas on the nature and effects of electric technology and The Beatles’ own engagement of that technology; offers analyses of key works from The Beatles’ studio years; and collates these data to offer stunning conclusions about The Beatles’ creative process in the recording studio and its cultural implications.

Transforming McLuhan- Paul Grosswiler 2010 "Transforming McLuhan explores the radical, humanist line of descent in interpreting Canadian media and culture theorist Marshall McLuhan’s work, rejecting the dominant view of McLuhan as a conservative, uncritical herald of technological determinism and capitalism. This McLuhan is the oppositional critic of modernity, resisting uncontrolled technological change, who sees new media forms with a human face. Contributors from diverse international and academic perspectives include Douglas Kellner, Nick Stevenson, Gary Genosko, Richard Carell, Lance Strate, Glenn Willmott, Patrick Brantlinger, Donna Flayhan, and Bob Hanke. "— Marshall McLuhan was the first to theorize and to develop a concept of media, indicating their importance to all areas of society and culture. Today media are far more pervasive than in the 1950s and 1960s when he wrote. Yet his work has still not received its due attention. Transforming McLuhan will begin to correct this oversight."—Mark Poster, University of California-Irvine; Author of What’s the Matter with the Internet? and Information Please! "Transforming McLuhan re-reads the McLuhan phenomenon in light of today’s media-saturated, 24/7 news and smartphone world. Here we meet again with the visionary Tiresias in the Underworld whose dark sayings once lit the late afternoon of the twentieth century. These critical readings create a time-out to question him again and to open space-time interstices for alternate thoughts and alternate actions."—Michael Heim, Mount St. Mary’s College, Los Angeles; Author of The Metaphysics of Virtual Reality and Virtual Realism! "Transforming McLuhan offers rich and textured reconsideration of Marshall McLuhan’s ideas, demonstrating how McLuhan’s work is a better match for current multi-dimensional and ambivalent understandings of media and culture than it was for the narrower conceptions that guided those who dismissed McLuhan in his own time. These provocative and well-written essays persuasively engage in what I have called morphing McLuhan with other key theoretical frameworks. As a result, Transforming McLuhan illustrates that cultural theorists have much to learn from McLuhanism, but that McLuhan’s perspective also has much room for enrichment from critical media studies."—Joshua Meyrowitz, University of New Hampshire; Author of No Sense of Place: The Impact of Media on Social Behavior—BOOK JACKET.

Marshall McLuhan’s Mosaic- Elena Lamberti 2012-02-28 One hundred years after Marshall McLuhan’s birth, Elena Lamberti explores a fundamental, yet neglected aspect of his work: the solid humanistic roots of his original ‘mosaic’ form of writing. In this investigation of how his famous communications theorist has been influenced by literature and the arts, Lamberti proposes a new approach to McLuhan’s thought. Lamberti delves into McLuhan’s humanism in light of his work on media and culture, exploring how he began to perceive literature not just as a subject, but as a function inseparable from communal existence. Lamberti pays particular attention to the central role played by Modernism in the making of his theories, including the writings of Ford Maddox Ford, James Joyce, Ezra Pound, and Wyndham Lewis. Reconnecting McLuhan with his literary past, Marshall McLuhan’s Mosaic is a demonstration of one of his greatest ideas: that literature not only matters, but can help us understand the hidden patterns that rule our environment.

Marshall McLuhan: Renaissance for a Wired World- Gary Genosko 2005 This collection contains key critical essays and assessments of the writings of Canadian communications thinker Marshall McLuhan selected from the voluminous output of the past forty years. McLuhan’s famous aphorisms and uncanny ability to sense megatrends are once again in circulation across and beyond the disciplines. Since his untimely death in 1980, McLuhan’s ideas have been rediscovered and redeplored with urgency in the age of information and cybernation. Together the three volumes organise and present some forty years of indispensable critical works for readers and researchers of the McLuhan legacy. The set includes critical introductions to each section by the editor. Forthcoming titles in this series include Walter Benjamin (0-415-32533-1) December 2004, 3 vols, Theodor Adorno (0-415-30464-4) April 2005, 4 vols and Jean-Francois Lyotard (0-415-33819-0) 2005, 3 vols.

Taking Up McLuhan’s Cause- Robert K. Logan 2017-04-04 This book brings together a number of prominent scholars to explore a relatively under-studied area of Marshall McLuhan’s thought: his idea of formal cause and the role that formal cause plays in the emergence of new technologies and in structuring societal relations. Aiming to open a new way of understanding McLuhan’s thought in this area, and to provide methodological grounding for future media ecology research, the book runs the gamut, from contributions that directly support McLuhan’s arguments to those that see in them the germs of future developments in emergent dynamics and complexity theory.

Undisciplined Theory- Gary Genosko 1998-04-28 What is the value of interdisciplinary theory? Are there any boundaries left which social theory must recognize? This book shows that the vital questions in theory are being posed and followed at the interdisciplinary level. Our awareness of this is curtailed by the institutional organization of social theory which still tends to assume a canon and clear boundaries. Gary Genosko proposes that postmodernism has provided the main challenge to institutional myopia. Yet postmodernism is too often treated as an aberration or a blind alley. The challenge for social theorists today is to develop and practice undisciplined theories which constantly question the limits of the canon and expose the porous character of boundaries. The book contains rigorous and original analyses of the writings of Baudrillard, Deleuze, Guattari, McLuhan, Freud and St Augustine. The author uses these materials to point the way to credible forms of undisciplined theory. Three tasks emerge as urgent issues for social theory: the need to think and feel ambivalence; to track the circulation of anomalies in theoretical texts; and to learn from the fascination with interpretative boundlessness.

McLuhan: A Guide for the Perplexed- W. Terrence Gordon 2010-02-25 Marshall McLuhan was a media guru when he came to prominence in the 1960s. The Woodstock generation found him cool, their parents found him perplexing. By 1963, McLuhan was Director of the Centre for Culture and Technology at the University of Toronto and would be a public intellectual on the international stage for more than a decade, then linked forever to his two best known coinages: the global village and the medium is the message. Taken as a whole, McLuhan’s writings reveal a profound coherence and illuminate his unified vision for the study of language, literature, and culture, grounded in the broad understanding of any medium or technology as an extension of the human body. McLuhan: A Guide for the Perplexed is a close reading of all of his work with a focus on tracing the systematic development of his thought. The overriding objective is to clarify all of McLuhan’s thinking, to consolidate it in a fashion which prevents misreading, and to open the way to advancing his own program: ensuring that the world does not sleepwalk into the twenty-first century with nineteenth-century perceptions.

Theorizing Globalization- Marko Ampuja 2012-07-25 In this work, Marko Ampuja offers a critical reassessment of mainstream perspectives on globalization, challenging their media-centrism and their lack of historical materialist analysis of global capitalism and the power of neoliberalism.

McLuhan: Janine Marchessault 2005 Why is McLuhan important? What use can we make of his approach to the media today? In this critical introduction, McLuhan’s contribution is explained and his reputation reassessed.
How McLuhan's ideas persist and are distorted through Baudrillard's work. He argues that it is through Baudrillard's influence that McLuhanism has had its greatest impact on contemporary cultural thought and practice. McLuhan and Baudrillard insights into the significance of current media trends in relation to issue of credibility and identity. This is an essential introduction that is clear, comprehensive, and easy to remember. It is full of wise and witty art by Susan Willmarth that is a perfect match to W. Terrence Gordon's writing. McLuhan envisioned the media generated Global Village before it existed, and no one since McLuhan has described its allure and pitfalls better.

Media TechnologiesTarleton Gillespie 2014-01-24 Scholars from communication and media studies join those from science and technology studies to examine media technologies as complex, sociocultural phenomena. In recent years, scholarship around media technologies has finally shed the aura of novelty and surprisingness that pervaded media studies from the 1980s onward. Media studies scholars have come to realize that technology is not an external force to be shaped by society, but a complex social phenomenon that shapes and is shaped by society. This book brings together scholars from communication and media studies to examine media technologies as complex social phenomena, highlighting the ways in which technology shapes and is shaped by society.

Communication Habits for the Pilgrim Church-Warren A. Kappeller III 2009 Communication has become an important theme and heuristic concept in practical theology for Roman Catholics during the ecumenical age. Communication Habits for the Pilgrim Church explains why the moral order is given priority in Vatican teaching about communication and the reasons for Catholic social teaching to make moral judgments about these new realities. Attention is given to the discursive aspects of religious authority, argumentation, bureaucratization, and market culture. Chapter five develops major tenets of a critical analysis of the communication of the post-Vatican II Church: attention is given to the discursive aspects of religious authority, argumentation, bureaucratization, and market culture. The Gutenberg Galaxy-Marshall McLuhan 2017-06-22 The Gutenberg Galaxy catapulted Marshall McLuhan to fame as a media theorist and, in time, a new media protagonist. Fifty years after its initial publication, this landmark text is more significant than ever before. Readers will be amazed by McLuhan's prescience, unmatched by anyone else, as he did the dramatic technological innovations that have fundamentally changed how we communicate. The Gutenberg Galaxy foresaw the networked, compressed 'global village' that would emerge in the late-twentieth and twenty-first centuries—first in print and now in digital form. The book's central theme is the relationship between the technological and the cultural, and the contribution of mass media to the transformation of society. This edition also includes new introductory essays that set out a path for themselves and take charge of their own life and future. A diverse team of expert authors review past and current studies with critical assessment of arguments and propositions, and document the changing relationship between millennials and legacy media, which rely on the younger generation for survival. **Medium Law**

Daithi Mac Síthigh 2017-09-13 Why should anyone care about the medium of communication today, especially when talking about media law? In today’s digital society, many emphasise convergence and seek new regulatory approaches. In Medium Law, however, the ‘medium theory’ insights of Harold Innis, Marshall McLuhan and the Toronto School of Communication are drawn upon as part of an argument that differences between media, and technological definitions, continue to play a crucial role in the regulation of the media. Indeed, Mac Síthigh argues that the idea of converged, cross-platform, medium-neutral media regulation is unattainable in practice and potentially undesirable in substance. This is demonstrated through the exploration of the regulation of a variety of platforms such as films, games, video-on-demand and premium rate telephone services. Regulatory areas discussed include content regulation, copyright, tax relief for producers and developers, new online services, conflicts between regulatory systems, and freedom of expression. This timely and topical volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Law, Policy, Regulation, Media Studies, Communications History, and Cultural Studies.

**The Modernist Legacy: Essays on New Music**

BJ Heile 2017-07-05 This collection of essays offers a historical reappraisal of what musical modernism was, and what its potential for the present and future could be. It thus moves away from the binary oppositions that have beset twentieth-century music studies in the past, such as those between modernism and postmodernism, between conceptions of musical autonomy and of cultural contingency and between formalist-analytical and cultural-historical approaches. Focussing particularly on music from the 1970s to the 1990s, the volume assembles approaches from different perspectives to new music, with a particular emphasis on a critical reassessment of the meaning and function of the legacy of musical modernism. The authors include scholars, musicologists and composers who combine culturally, historically and aesthetically oriented approaches with analytical methods in imaginative ways.

**Essential McLuhan**

Eric McLuhan 1995 Marshall McLuhan’s insights are more applicable today than when he first announced them to a startled world in the 1960s. Here, in one concise volume, are McLuhan’s key ideas, drawn from his books, articles, correspondence, and published speeches. This book is the essential archive of his constantly surprising vision.

**At the Speed of Light There is Only Illumination**

John George Moss 2004 At the Speed of Light There is Only Illumination is a collection of re-evaluative essays that measure Marshall McLuhan and his critical and theoretical legacy. Each contribution works toward a larger critical mosaic that as a whole offers a new version of McLuhan as an intellectual adventurer and cultural icon, of his ideas in complex architecture and brilliant lines. John Moss and Linda Morra drew the collection’s essays from a symposium on McLuhan held at the University of Ottawa in Ottawa in 2000. Given McLuhan’s prominent status in many academic disciplines, the contributors reflect a multidisciplinary background. Each essay is unique in its approach. Whereas some are extraordinarily personal and anecdotal, others are intellectually and provocatively engaged with McLuhan’s ideas and the manner in which these have been appropriated in contemporary discourse.

**Television and the Modernization Ideal in 1980s China**

Huike Wen 2013-11-22 Using theories of visual culture, media technology, globalization and gender studies supplemented by visual images and interviews, the book explores Chinese television history in the pivotal decade of the 1980s from the cultural studies viewpoint and explains the intellectual reception of television in China during the ‘80s.

**McLuhan’s Techno-Sensorium City**

Jaqueline McLeod Rogers 2020-10-14 In McLuhan’s Techno-Sensorium City: Coming to Our Senses in a Programmed Environment, Jaqueline McLeod Rogers argues that Marshall McLuhan was both an activist and a speculative urbanist who drew from cross-disciplinary and archival sources to explore constitutive exchanges between humanity and technologies to alter human perception and imagine a sustainable future based on collective participation in a responsive urban environment. This environment—a techno-sensorium—would endeavor to design and program technology to be favorable to life and capable of engaging with multiple senses. McLeod Rogers examines McLuhan’s active engagement with the vibrant art and urban design culture of his day to further understand the ways in which the links he drew between media, technology, space, architecture, art, and cities continue to inform current urban art and criticism and practices. Scholars of media studies, urbanism, philosophy, architecture, and sociology will find this book particularly useful.

**McLuhan and Northrop Frye**

B.W. Powe 2014-04-30 Marshall McLuhan and Northrop Frye are two of Canada’s central cultural figures, colleagues and rivals whose careers unfolded in curious harmony even as their intellectual engagement was antagonistic. Poet, novelist, essayist and philosopher B.W. Powe, who studied with both of these formidable and influential intellectuals, presents an exploration of their lives and work in Marshall McLuhan and Northrop Frye: Apocalypse and Alchemy. Powe considers the existence of a unique visionary tradition of Canadian humanism, in which McLuhan and Frye adopt configurations of literary and intellectual traditions to come to grips with the study of literature and to the broader engagement with culture. Examining their eloquent but often acid responses to each other, Powe exposes the scholarly controversies and personal conflicts that erupted between them, and notably the great commonalities in their writings and biographies. Using interviews, letters, notebooks, and their published texts, Powe offers a new alchemy of their thought, in which he combines the philosophical ballamcars of McLuhan’s “The medium is the message” and Frye’s “the great code.”

**Faith, War, and Violence**

Gabriel R. Rico 2017-09-08 Faith, War, and Violence analyzes the age-old links between religion and violence perpetrated in the name of God, and the role religion performs in politically influsing the state with romantic spiritualism. The volume examines instances of this phenomenon from ancient Rome to the modern day: it finds that religion-inspired violence is not restricted to Abrahamic faiths or to one geographic region. The fact that symbolically charged religious violence has destructive consequences is not lost on contributors to Faith, War, and Violence. Among the subjects tackled are: the ideological and religious foundations that inspired the founders of Al-Qaeda and its role in the Arab Spring; the long history of religious conflict in Ireland known as the Troubles; Sikh extremism; and the evolution of the Christian approach to war. As the contributors demonstrate, in Western societies, the unity of religious fervor and pacifism is unattainable in practice and potentially undesirable in substance. This is demonstrated through the exploration of the regulation of a variety of platforms such as films, games, video-on-demand and premium rate telephone services. Regulatory areas discussed include content regulation, copyright, tax relief for producers and developers, new online services, conflicts between regulatory systems, and freedom of expression. This timely and topical volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Law, Policy, Regulation, Media Studies, Communications History, and Cultural Studies.

The Legacy of Francis Bacon 1971

Under Suspicion Boris Groys 2012-04-17 The author focuses on the media’s affect of sincerity and its manufacture of trust to appease skeptics. He identifies forms of media sincerity and its effect on politics, culture, society, and conceptions of the self. He relies on different philosophical writings thematizing the gaze of the other, from the theories of Heidegger, Sartre, Mauss, and Bataille to the poststructuralist formulations of Lacan and Derrida. He also considers media “states of exception” and their creation of effects of sincerity – a strategy that feeds the media’s predilection for the extraordinary and the sensational, further fueling the public’s suspicions.

Digital Dieting Tara Brabazon 2016-04-22 Imagine if a student spent as much time managing information as celebrities doted on dieting? While eating too much food may be the basis of a moral panic about obesity, excessive information is rarely discussed as a crisis of a similar scale. Obviously, plentiful and high quality food is not a problem if eating is balanced with exercise. But without the skills of media and information literacy, students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge, imagination and questioning. Digital Dieting: From Information Obesity to Intellectual Fitness probes the social, political and academic difficulties in managing large quantities of low quality information. But this book does not diagnose a crisis. Instead, Digital Dieting provides strategies to develop intellectual fitness that sorts the important from the irrelevant and the remarkable from the banal. In April 2010, and for the first time, Facebook received more independent visitors than Google. Increasingly there is a desire to share rather than search. But what is the impact of such a change on higher education? If students complain that the reading is ‘too hard’, then one response is to make it easier. If students complain that assignments are too difficult, then one way to manage this challenge is to make the assignments simpler. Both are passive responses that damage the calibre of education and universities in the long term. Digital Dieting: From Information Obesity to Intellectual Fitness provides active, conscious, careful and applicable strategies to move students and citizens from searching to researching, sharing to thinking, and shopping to reading.
