A Guide To Species Irises Their Identification And Cultivation

A Complete Guide to Iris Flower Meaning and Symbolism
Feb 17, 2021 · Irises grow in colder regions, in the temperate climates across northern hemispheres, from Europe to Asia and even North America. The genus iris has more than 300 species which belong to beardless and bearded groups; and it comes in different shades of blue, purple, yellow, lavender, white, orange, and peach.

How to Grow Reblooming Irises | Better Homes & Gardens
Jun 09, 2015 · Reblooming irises grow faster than regular irises, so you'll need to divide them more often. To prevent overcrowding, divide reblooming iris every two to three years, but take only the outside rhizomes of the plant; leave the healthy older portions of the ...

When to Cut Back Irises for Healthier, More Attractive Plants
When to cut back irises to prevent iris borer. Iris borers (Macronoctua onusta) are a species of moth larva that feed on the rhizomes of bearded iris. Their feeding causes iris
foliage to turn slimy and yellow. Often there is a putrid smell around the plant (think rotten potato).

**Oriental Lilies - Gardenia.net**
Usually the last lilies to bloom, Oriental hybrid Lilies are derived from the crossing of interspecific hybrids and species Lilies such as Lilium auratum, Lilium japonicum, Lilium nobilissimum, Lilium × parkmanii, Lilium rubellum and Lilium speciosum (but excluding all hybrids of these with henryi).

The Chickahominy River Marsh is home to 19 different species of birds including the nationally endangered Ridgway’s Rail. Virginia birding lovers will have many great places to enjoy bird watching in Virginia.

**Bald eagle - Wikipedia**
Description. The plumage of an adult bald eagle is evenly dark brown with a white head and tail. The tail is moderately long and slightly wedge-shaped. Males and females are identical in plumage coloration, but sexual dimorphism is evident in the species, in that females are 25% larger than males. The beak, feet and irises are bright yellow. The legs are feather-free, and the toes are short
