Masting and Rigging the Clipper Ship and Ocean Carrier - Harold A. Underhill 1958

Rudimentary treatise on masting, mast-making, and rigging of ships - Robert Kipping 1864

Masting and Rigging the Clipper Ship & Ocean Carrier - Harold A. Underhill 1946 The volume containing 50 full-page working drawings and 200 detail sketches, fully covers the whole subject of spar construction and rig of nineteenth and twentieth century Sailing Ships.

Rudimentary Treatise on Mast-Making and Rigging of Ships - Robert Kipping 1854

Masting and Rigging Harold A. Underhill 1953

The Rigging of Ships - R. C. Anderson 1994-03-14 For ship model-makers and students and enthusiasts of historic sailing ships, this generously illustrated book is essential reading and invaluable as a reference. It describes and depicts in detail how 17th-century English, French, Dutch and other European trading ships and warships were rigged from stem to stern throughout this colorful period in maritime history. The book begins in 1600, the earliest date of our detailed knowledge of ships' rigging, and the earliest to which that characteristic 17th-century fitting, the spritsail topmast, has been traced. It ends in 1720, roughly the time when the spritsail topmast was superseded by the jib boom and other innovations of the 18th-century rigging. The book's 12 chapters cover every aspect of ship's rigging of the period, from the lower masts and bowsprit to the running rigging of the topsails and topgallants. Over 300 fine line drawings illustrate every item used in the rigging. Twenty-five half-tones, extensively annotated, illustrate typical ships that plied the seas in the days of the bowsprit mast - English merchantmen and gun ships, French and Dutch men-of-war and more.

Masting and rigging Harold A. Underhill 1946

Spars and Rigging John M'Leod Murphy 2012-09-26 Important study describes every improvement made in seafaring equipment up to the mid-19th century — from anchors, hawseholes, booms, and cat-head stoppers, to a flying jib, halliards, nippers, and topsail buntlines. 218 illustrations.

Masting and Rigging Harold Alonso Underhill 1965

Rigging Period Ships Models - Lennarth Petersonson 2011-03-30 The rigging of period ship models is the most complex task which any modeller has to take on, for an eighteenth-century man-of-war boasted mile on mile of rigging, more than 1,000 blocks, and acres of canvas. To reduce this in scale, and yet retain an accurate representation, is an awesome undertaking. This now classic work untangles the complex web, and, using some 400 drawings, the author shows clearly how each separate item of rigging is fitted to the masts, yards and sails. Each drawing deals with only one particular item so that it can be seen clearly in isolation. The lead of a particular halliard, the arrangement of a bracing line, these and every other detail is depicted with startling clarity. Based on the author's research of numerous eighteenth-century models, each one with its contemporary rigging still extant, the information is both meticulous and accurate. The remarkable visual immediacy and clarity of this work makes it truly unique and no modeller of period ships can afford to be without it at his side. In addition, the book is a [must-have] practical reference work for all those involved in the rigging and repair of historic ships.

Masting and Rigging the Clipper Ship & Ocean Liner Harold A. Underhill 1946

Masting and Rigging. The Clipper Ship and Ocean Carrier. With Authentic Plans, Working Drawings and Details of the Nineteenth and Twentieth Century Sailing Ship, Etc Harold Alonso UNDERHILL 1946

Skipper's Mast and Rigging Guide Rene Westerhuis 2013-05-10 The Skipper's Mast and Rigging Guide is a new title in our popular series of cockpit guides that are designed for easy reference on board in all weather conditions. Of all the elements that are hard to set up on a sailboat, gauging how mast, running rigging and standing rigging should work in combination with each other is perhaps the trickiest of arts - some might call it a black art. And of course it is essential to get it right in order to stabilize the mast, reduce undue stress and consequently ensure the safety of everyone on board. This handy cockpit guide will simplify and explain to the reader exactly how to set up their mast, rigging and running rigging for whatever size of yacht and with whatever rig combination. It will take the reader through the basics of setting up and adjusting their rig step by step with helpful diagrams and detailed colour photographs throughout. With this book in one hand and a spanner in the other, skippers will be able to make their own adjustments without having to call in expensive riggers.
