Poisonwood Bible

**The Poisonwood Bible**-Barbara Kingsolver 2008-09-04 Barbara Kingsolver's acclaimed international bestseller tells the story of an American missionary family in the Congo during a poignant chapter in African history. It spins the tale of the fierce evangelical Baptist, Nathan Price, who takes his wife and four daughters on a missionary journey into the heart of darkness of the Belgian Congo in 1959. They carry with them to Africa all they believe they will need from home, but soon find that all of it - from garden seeds to the King James Bible - is calamitously transformed on African soil. Told from the perspective of the five women, this is a compelling exploration of African history, religion, family, and the many paths to redemption. The Poisonwood Bible was nominated for the Pulitzer Prize in 1999 and was chosen as the best reading group novel ever at the Penguin/Orange Awards. It continues to be read and adored by millions worldwide.

An Introduction to Sustainable Transportation

**An Introduction to Sustainable Transportation**-Preston L. Schiller 2010 Transportation plays a substantial role in the modern world; it provides tremendous benefits to society, but it also imposes significant economic, social and environmental costs. Sustainable transport planning requires integrating environmental, social, and economic factors in order to develop optimal solutions to our many pressing issues, especially carbon emissions and climate change. This essential multi-authored work reflects a new sustainable transportation planning paradigm. It explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility management solutions to transportation problems. This text reflects a fundamental change in transportation decision making. It focuses on accessibility rather than mobility, emphasizes the need to expand the range of options and impacts considered in analysis, and provides practical tools to allow planners, policy makers and the general public to determine the best solution to the transportation problems facing a community. Featuring extensive international examples and case-studies, textboxes, graphics, recommended reading and end of chapter questions, the authors draw on considerable teaching and researching experience to present an essential, ground-breaking and authoritative text on sustainable transport. Students of various disciplines, planners, policymakers and concerned citizens will find many of its provocative ideas and approaches of considerable value as they engage in the processes of understanding and changing transportation towards greater sustainability.

Exploited Child

**The Exploited Child**-Bernard Schlemmer 2000-07 This investigation of child labor explores difficult conceptual and public policy issues. It demonstrates the sheer prevalence of the commercial exploitation of child labor in both industrial and developing countries, and its rapid growth today under the twin pressures of mass poverty and the globalized marketplace for labor. In addition to its rich empirical material from countries in Asia, Latin America, Africa, and Europe, the author makes a clear distinction between the socialization of children through labor within the family and their economic exploitation for profit. It also focuses on the role of adults with responsibility for children, and the specific form which paternal domination takes towards children.

The New Frontiers of Fashion Law

**The New Frontiers of Fashion Law**-Rossella Esther Cerchia 2021-01-13 Fashion law encompasses a wide variety of issues that concern an article of clothing or a fashion accessory, starting from the moment they are designed and following them through distribution and marketing phases, all the way until they reach the end-user. Contract law, intellectual property, company law, tax law, international trade, and customs law are of fundamental importance in defining this new field of law that is gradually taking shape. This volume focuses on the new frontiers of fashion law, taking into account the various fields that have recently emerged as being of great interest for the entire fashion world: from sustainable fashion to wearable technologies, from new remedies to cultural appropriation to the regulation of model weight, from advertising law on the digital market to the impact of new technologies on product distribution. The purpose is to stimulate discussion on contemporary problems that have the potential to define new boundaries of fashion law, such as the impact of the heightened ethical sensitivity of consumers (who increasingly require effective solutions), that a comparative law perspective renders more interesting. The volume seeks to sketch out the new legal fields in which the fashion industry is getting involved, identifying the new boundaries of fashion law that existing literature has not dealt with in a comprehensive manner.

A Mind Always in Motion: The Autobiography of Emilio Segrè

**A Mind Always in Motion: The Autobiography of Emilio Segrè**-Emilio Segrè 2019-08-17 Born in Italy to a well-to-do Jewish family, Emilio Segrè (1905-1989) became Enrico Fermi’s first graduate student in 1928, contributed to the discovery of slow neutrons and was appointed director of the University of Palermo’s physics laboratory in 1936. While visiting the Radiation Laboratory in Berkeley, California in 1938, he learned that he had been dismissed from his Palermo post by Mussolini’s Fascist regime. Ernest O. Lawrence hired him to work on the cyclotron at Berkeley with Luis Alvarez, Edwin McMillan, and Glenn Seaborg. Segrè was one of the first to join Oppenheimer at Los Alamos, where he became a group leader on the Manhattan Project. In 1959, he won the Nobel Prize in physics for the discovery of the antiproton. He was a professor of physics at UC Berkeley from 1946 until 1972. “[A] readable, absorbing, interesting autobiography... A valuable contribution by a person who witnessed the development of much of modern nuclear physics. Segrè’s description of the historic neutron experiments performed in Rome during the mid-1930s by Enrico Fermi’s group, of which Segrè was a member, is of inestimable worth.” — Glenn T. Seaborg, Physics Today “A Mind Always in Motion is Emilio Segrè’s account — published four years after his death in 1989 — of his personal life and his life in physics... It is absorbing, moving in places and frequently revealing. Segrè noted in his preface, ‘I have not sought to display manners and tact I never had, and I have tried to treat myself no better than any one else.’ He ably succeeded in these purposes.” — Daniel J. Kevles, Nature “For general readers with an interest in the history of nuclear physics, Segrè... is among the most personable witnesses.” — Publishers Weekly

Peugeot 206

**Come on Down?**-Dominic Strinati 2004-02-24 Come on Down represents an introduction to popular media culture in Britain since 1945. It discusses the ways in which popular culture can be studied, understood and appreciated, and covers its key analytical issues and some of its most important forms and processes. The contributors analyse some of popular culture's leading and most representative expressions such as TV soaps, quizzes and game shows, TV for children, media treatment of the monarchy, Pop Music, Comedy, Advertising, Consumerism and Americanization. The diversity of both subject matter and argument is the most distinctive feature of the collection, making it a much-needed and extremely accessible, interdisciplinary introduction to the study of popular media culture. The contributors, many of them leading figures in their respective areas of study, represent a number of different approaches which themselves reflect the diversity and promise of contemporary theoretical debates. Their studies encompass issues such as the economics of popular culture, its textual complexity and its interpretations by audiences, as well as concepts such as ideology, material culture and postmodernism.

Nolander

**Nolander**-Becca Mills 2012-04-02 Beth Ryder knows she's different. In a tiny rural town, being an orphaned and perpetually single amateur photographer crippled by panic disorder is pretty much guaranteed to make you stick out like a sore thumb. But Beth doesn't understand just how different she really is. One day, strange things start cropping up in her photos. Things that don't look human. Impossible things. Monstrosities. Beth thinks her hateful sister-in-law, Justine, has tampered with her pictures to play a cruel joke, but rather than admitting or denying it, Justine up and vanishes, leaving the family in disarray. Beth's search for Justine plunges her into a world she never knew existed, one filled with ancient and terrifying creatures. Both enemies and allies await her there—a disturbingly sexy boss, a sentient wolf with diamond fur, body-snatching dinosaur-birds. Separating the allies from the enemies is no easy chore, but in this strange new world, allies are a necessity. A plot is afoot, and Beth—whose abilities no one seems able to explain—may well hold the key to solving it. Nolander is the first novel in the fantasy series Emanations. The second novel, Solatium, and a short story, "Theriac," are also available. The Emanations Series Of all the beings that have lived on Earth, what if just a few had the power to make new realities, according to their desires? What would they create? The Second Emanation: a shadow world where ancient creatures persist, where humanity's dominance is far less certain, where wonder competes with horror. A world like an autumn forest, its realities as multiple and layered as fallen leaves. The world that gives us our gods. In Becca Mills's Emanations series, this strange and magical world crosses paths with a seemingly ordinary young woman from the American Midwest. It'll never be the same again. Reviews "This is among the best of the urban fantasy genre, and it is a wonder why a major publisher has yet to pick it up. Mills has given us such a dynamic world with vibrant characters and multiple plot lines that really bring it all to life." - Twisting the Lens "I simply loved Nolander. I'm going to put it out there and say that this is one of the best debut fantasy books I've read this year! It was that fantastic." - scifinrdsare.us "Nolander was a highly entertaining read. Each time I thought I had a handle on what was going on and what was going to come next the plot would take a turn to something completely unexpected. Becca Mills has created a very vibrant world full of unique creatures and happenings where just about anything you can imagine is possible." - The Dragon's Inkpot Series keywords: fantasy, urban fantasy, contemporary fantasy, fantasy series, speculative fiction, hard fantasy, dark fantasy, paranormal, female protagonist, female main character, science fantasy, action, adventure, monsters, deities, gods, demons, dragons, dying earth, action, fantasy action, magic, alternative history, parallel world, free, freebie

Handbook of Phenomenology and Cognitive Science

**Handbook of Phenomenology and Cognitive Science**-Daniel Schmicking 2009-12-16 This volume explores the essential issues involved in bringing phenomenology together with the cognitive sciences, and provides some examples of research located at the intersection of these disciplines. The topics addressed here cover a lot of ground, including questions about naturalizing phenomenology, the precise methods of phenomenology and how they can be used in the empirical cognitive sciences, specific analyses of perception, attention, emotion, imagination, embodied movement, action and agency, representation and cognition, inters- jectivity, language and metaphor. In addition there are chapters that focus on empirical experiments involving psychophysics, perception, and neuro- and psychopathologies. The idea that phenomenology, understood as a philosophical approach taken by thinkers like Husserl, Heidegger, Sartre, Merleau-Ponty, and others, can offer a positive contribution to the cognitive sciences is a relatively recent idea. Prior to the 1990s, phenomenology was employed in a critique of the first wave of cognitivist and computational approaches to the mind (see Dreyfus 1972). What some consider a second wave in cognitive science, with emphasis on connectionism and neuros- ence, opened up possibilities for phenomenological intervention in a more positive way, resulting in proposals like neurophenomenology (Varela 1996). Thus, bra- imaging technologies can turn to phenomenological insights to guide experimen- tion (see, e. g., Jack and Roepstorff 2003; Gallagher and Zahavi 2008).

**Consuming History**-Jerome de Groot 2016-02-08 Consuming History examines how history works in contemporary popular culture. Analysing a wide range of cultural entities from computer games to daytime television, it investigates the ways in which society consumes history and how a reading of this consumption can help us understand popular culture and issues of representation. In this second edition, Jerome de Groot probes how museums have responded to the heritage debate and how new technologies from online game-playing to internet genealogy have brought about a shift in access to history, discussing the often conflicted relationship between 'public' and academic history and raising important questions about the theory and practice of history as a discipline. Fully revised throughout with up-to-date examples from sources such as Wolf Hall, Game of Thrones and 12 Years a Slave, this edition also includes new sections on the historical novel, gaming, social media and genealogy. It considers new, ground-breaking texts and media such as YouTube in addition to entities and practices, such as re-enactment, that have been underrepresented in historical discussion thus far. Engaging with a broad spectrum of source material and comparing the experiences of the UK, the USA, France and Germany as well as exploring more global trends, Consuming History offers an essential path through the debates for readers interested in history, cultural studies and the media.
